

# WORKWEAR

## WORKWEAR

Safety Jogger workwear equals both tough and good-looking garments, adaptable to the individual needs of each professional.

We continuously roll up our sleeves to provide workwear that works for everyone, whether you're on or off duty. Workwear that combines high-quality fabrics with extremely durable materials. Workwear that is comfortable and a pleasure to wear in all kinds of settings. Workwear that combines multiple functional features with a noticeable modern look.

Or in other words:

garments that will fit **each professional, each activity and each environment like a glove.**

### HEIQ ODOUR CONTROL

The HeiQ Mint plant-based deodorizer controls malodor development on textiles, providing fabrics with a **long-lasting odor control capability** that keeps textiles smelling fresh all day long.

### Did you know our workwear meets **several norms and standards?**

EN ISO 20471  
**High-visibility workwear**

Makes the wearer visible from all directions at day, dusk and night. This protective clothing is required by law for anyone working on roads and construction sites. High-visibility workwear is categorized into three different classes that describe how well the product can make the user visible.

	Class 1	Class 2	Class 3
Fluorescent material	0,14 m <sup>2</sup>	0,50 m <sup>2</sup>	0,80 m <sup>2</sup>
Reflective material	0,10 m <sup>2</sup>	0,13 m <sup>2</sup>	0,20 m <sup>2</sup>

EN 343  
**Waterproof workwear**

Protects against rain, snow, fog and ground moisture. The material and seams are tested for resistance to water penetration and vapor.

EN 14404  
**Workwear with knee protectors**

Protects worker's knees when working in a kneeling position. The kneepads are tested for shock absorption, pressure distribution, resistance to sharp or pointed objects and various other requirements.

## From 2-way to 4-way stretch

Comfort, flexibility and freedom of movement. the key features of all our work garments. That's why even in our **basic models**, we use

**stretch materials** for supreme comfort. Our **more advanced models**, in turn, have 4-way stretch in key areas. **4-way stretch** is stretchable in all directions and recovers both width and lengthwise, moving with your body and providing an unbeatable level of performance.

## Wearing comfort that goes beyond a good fit

In addition to stretch fabrics, the design and material choices of our garments also contribute to the high level of comfort:

- ✓ Comfortable and soft materials
- ✓ Breathable zones in strategic places
- ✓ Lightweight fabrics that do not weigh you down
- ✓ Excellent wicking and drying performance in smart spots
- ✓ Strategically placed pockets and accessories that do not hinder

## Softshell: a jacket essential

Need to maintain an ideal body temperature while being protected from the cold, wind and rain? Softshell holds the answer!

**Softshell** indicates a **category of technical fabrics that ensure maximum comfort in changing weather** and are particularly suitable for **physical outdoor activities**.

Why? Because generally, the more waterproof a garment is, the less breathable. Also more moisture will get trapped inside. Softshell is created specifically to **facilitate the release of moisture and regulate body temperature**.

To guarantee excellent performance, softshell jackets consist of **three layers of different materials**:

- ✓ **Outer layer** in **water-repellent** polyester, offering protection against bad weather
- ✓ **Middle layer** in a **breathable membrane**, allowing moisture to escape
- ✓ **Inner layer** made of **microfleece**, ensuring good thermal insulation

By connecting these three layers, we get a very light, elastic and soft material that provides numerous benefits:

- ✓ Flexible
- ✓ Breathable
- ✓ Insulating
- ✓ Water repellent
- ✓ Wind resistant

A photograph of three construction workers in black workwear and safety gear working on a window frame. The workers are wearing black t-shirts, black cargo trousers, and black safety boots. They are also wearing gloves and have tool belts. The background is a wall with orange tiles. The word "TROUSERS" is written in large, bold, yellow letters across the middle of the image. A yellow diagonal shape is on the left side of the image.

Men - EU S-3XL

A person is shown from the waist down, wearing dark blue work pants and black safety boots with yellow soles. They are wearing white safety gloves. One hand is holding a black knee pad with yellow accents. The knee pad has the text 'SAFETY JOGGER' and 'SHIELD' embossed on it. The background is a light-colored tiled floor. A large yellow diagonal shape is on the left side of the image.

## BAMBOO SOCK

### Even the best shoes won't deliver on their promised comfort if you don't wear the right socks

Did you know that feet have the highest density of sweat glands? This helps our bodies to cool down, but can also lead to wet, uncomfortable feet and skin problems such as blisters and athlete's foot. The **Safety Jogger Bamboo Sock** offers a solution to these problems with the following benefits:

- ✓ Eco friendly
- ✓ Sweat absorbent
- ✓ Antibacterial
- ✓ Thermoregulating
- ✓ Soft and hypoallergenic
- ✓ A perfect fit

#### Elastane content

Offers light compression to reduce foot swelling, especially during long workdays.

#### Breathable design

Thin, open knit allows warm, humid air to escape, enhancing airflow and comfort.

#### Raised heel area

Reduces friction and pressure points at the heel.

#### Terry loops

Act as cushions to reduce pressure while standing or walking.

#### Terry cloth structure

Absorbs moisture effectively to keep your feet dry.

#### Damping cushion

Strategically placed at the instep to ease pressure from tight shoes

#### Dense terry cloth structure at the tip

Eases pressure and discomfort for those wearing safety shoes with toe caps.
